Matthew:

Utilizing “Blue Plate Lofts” as a term to identify communications, we have currently reduced the number of emails to approximately 77,000. However, that includes internal communications which are not within the scope of your request and I anticipate will be a significant portion of the population. We are determining the best method to filter those from the query result, following which we will determine if there is a manageable volume to then remove those communications that contain private loan information.

With respect to emails to or from addresses with “@hriproperties.com”, the final query result was 5,707. We are continuing to examine the most efficient method to remove items that have private loan information. We currently anticipate concluding the review of those items and providing producible items to you by December 28, 2022.

With respect documents relating to payment information on the Blue Plate Lofts, that inherently requests documents relating to private loan information, which as previously referenced is considered protected. However, we can advise that our grant reporting system reflects that to date \$283,085.54 in program income has been generated through this loan, meaning repayments in that amount. This number is subject to reconciliation with any recent payments.

I will keep you advised with respect to the further decrease in volume of the 77,000 emails.

Please let me know if you have any questions regarding the above.

Dan Rees
